

Williams Unified ASSETS (After School Safety and Enrichment for Teens)The ASSETS

after-school program offers a diverse set of modules. Each module caters to different interests and needs of students. Included is a brief overview of each module:

AP Courses: Advanced Placement courses offer students the opportunity to take college-level classes while still in high school. This can provide them with a head start on their college education.

Tutoring: A valuable resource for students who may need additional help with their regular coursework. Tutoring can provide one-on-one assistance, helping students grasp challenging concepts and improve their academic performance.

Fitness Center: Promoting physical health and well-being, the fitness center includes exercise equipment and activities to encourage students to stay active and maintain a healthy lifestyle and conditioning for their chosen sport.

Anime Club: Focused on the appreciation and enjoyment of anime, this club provides a space for students to discuss, watch, and engage with Japanese animated media.

Animal Care: This module could involve hands-on experiences with caring for animals, promoting responsibility, and empathy, and fostering a love for animals among students as well as preparing them for caring for their FFA and 4H animals.

Social and Emotional Module: Recognizing the importance of emotional intelligence and well-being, this module offers activities and discussions to help students develop social skills and emotional resilience.

Music: This module includes opportunities for students to explore and develop their musical talents through activities such as playing instruments.

Sports: Providing a platform for students to engage in physical activities, team sports, and competitions. Sports modules can promote teamwork, discipline, and physical fitness.

Driver's Education Course and Behind the Wheel Training: This module provides students with the knowledge and understanding needed to become responsible and safe drivers. It may cover topics such as traffic laws, road safety, and the basics of operating a vehicle as well as hands-on driving experience with a qualified instructor. It allows students to apply the theoretical knowledge gained in the classroom in real-world driving situations.

These modules allow students to explore their interests, develop various skills, and contribute to their overall personal and academic growth.
